REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The instant invention claims a complex black oxide particle having a specific composition and a process to make such complex particle. The closest prior art references that relate to the claimed invention are JP'441, Buess'239, '272, Valayil'818 and Olson'936. The closest prior art teaches that it is known in the art to make and use cobalt, copper and manganese oxides to make particles. However, the prior art does not teach the claimed composition of complex black oxide and it does not fairly suggest that prior art compositions can be modify to meet the present claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to leszek b. kiliman whose telephone number is 571-272-1509. The examiner can normally be reached on M-T, 6.30-5.00.
